

ABOUT US

After 20 years of her disability journey, CEO & President, Janey MeA Lawson, began MeA's Transportation LLC with a very personal mission. It didn't take her long to see just how inaccessible everyday spaces and tasks can be. As she went from being bedridden to walking, she endeavored to be a part of an accessibility solution. She knew, firsthand, just how difficult it is to not only be restricted to one's home, but also have no clue where to start in a search for disability resources. She took matters into her own hands, from learning the city bus route to building relationships with resource fellows within the disability community. And with the rise of COVID, came an even greater transportation need for those diagnosed with physical and mental disabilities. So, when the opportunity arose to be the solution, Ms. Lawson partnered with disability resource agencies to be just that.

Since 2020, MeA's has operated as not only a transportation source but has slowly evolved into a go-to group for life solutions, providing job coaching and disability resource research. In 2022, MeA's partnered with Vice President, Donna Renee Chastain's RC Transportation, bringing together two close friends into the **M&R Transportation Services** umbrella partnership, determined to redefine ability, power, and support for the disabled. M&R has become known for its efficiency and passion for each client's journey towards independence. We sit with our clients on the ride, helping them find autonomy and teaching them to maintain it.

In my vision, I see
us empowering
individuals with
disabilities to learn,
love, work, live, and
play in their
communities,
because **THEY**
belong.
